## What is Waterpower Week?

Waterpower Week is the industry's premier policy event.

This event provides a once-a-year opportunity for those in the North American hydro industry to focus specifically on the regulatory, policy, markets, and legislative aspects of their work. It's also an important time to hear from and connect with others who affect the industry – regulators, resource agencies, and river and environmental communities.

Conference attendees will engage with sponsors and exhibitors through an interactive and dynamic virtual conference platform. The virtual system features multiple opportunities for sponsors and exhibitors to engage with our core audience of dedicated hydropower professionals, while attendees connect from the comfort and safety of their home or office. WPW 2021 will also provide the opportunity for your content to be viewed for one full year post-conference for maximum exposure!

WPW 2021 will be held the same week as the International Conference on Ocean Energy (ICOE) April 27<sup>th</sup>-April 29<sup>th</sup>. *(Please note: ICOE will take place April 28<sup>th</sup> – April 30<sup>th</sup>.)*

## About the Annual WPW Meeting

WPW will be an entirely virtual event for 2021. We had hoped to be able to hold this meeting in Washington D.C. as initially planned, it has become clear that the ongoing global health crisis will not be sufficiently resolved until late 2021. To ensure the health and safety of the meeting participants, our staff, the public, and travel bans, this will be the best method for keeping the meeting moving forward with the most current information in the industry.

### Enduring Content and Information

The “live” virtual meeting will be held from April 27-April 29. The online content will be available on the platform for a full year so attendees and exhibitors can connect or view sessions and exhibit content at any time. This enduring content will be available until April 30, 2022.

### Attendee Demographics

WPW Expected attendance – **325 waterpower professionals and power producers and suppliers.**
